A. <u>Mission Description and Budget Item Justification</u>: DCAA's RDT&E funds support the development of several document and records management systems designed to automate and enhance its audit workflow, and to fully transition to electronic record management by 2003.

Funding in the amount of \$250,000 is required for the Audit Planning & Performance System (APPS), a stand-alone audit workpaper and report system, which is being modified to improve the workflow among the audit, supervisory and administrative staffs and to develop automated report writing capabilities. Further enhancements will integrate APPS with the DCAA Management Information Systems and other appropriate audit databases. The Records Management Project for filing and archiving has selected iRIMS, a COTS software solution for tracking, archiving, retrieving, and disposition of electronic records. The software was adapted and tested to meet the records requirements for DCAA and to comply with DoD guidelines and security requirements. Funding in the amount of \$250,000 is required for piloting and testing for the development of a document management system designed to automate and enhance the audit workflow for Agency-wide use. The Information Technology Division is establishing a RDT&E functional test lab (\$50,000) which will have all the hardware, software and development tools necessary to test each product being considered for implementation into the DCAA Network environment.
